

JEW IN MIDST

—o— (Continued from Page 1) —o—

the figures compiled by the American Jewish Committee include only those persons who admitted that they were Jews. During the roughly 15 years following the issue of this order, several million people entered the U.S., many of them from Eastern and Central Europe.

Every 10 years, commencing in the year 1790, a census of all people living in America has been taken. In each census, among the questions asked has been the religious affiliation of each person. Therefore, it is of interest that in *The New York Times* of Dec. 13, 1957, was a statement that in the 1960 census the American people would not be asked their religion!

A sub-headline read: "Census Bureau Acts After Groups Protest Plan to Include Question on Preference." The *Times* news item contains this statement:

"Objectors to the inquiry had said that it would violate the separation of church and state, and would violate the privacy of conscience. The Census Bureau had maintained that the question would be useful to business, welfare, education, research, housing, and planning groups."

The *Times* article further stated:

"Explaining the retreat on religion, Robert W. Burgess, Director of the Bureau, said: 'The primary reason was recognition that at this time a considerable number of persons would be reluctant to answer such a question in the Census, where the reply is mandatory.'"

And the article closed with:

"The American Jewish Congress hailed yesterday the announcement by the Census Bureau. Dr. Israel Goldstein, president of the organization, termed it a 'far-reaching victory for traditional American freedoms.'"

Does the statement of the American Jewish Congress indicate what elements in the U.S. were pressing both for the ruling of 1943, and that of the Census Bureau in 1957? We know no other religious or ethnic group in the U.S. which seeks to conceal its numbers.

How many of the 3 to 5 million aliens illegally in the U.S. are Jews? A responsible authority stated to us recently that there are at least 8 million Jews in the U.S. Probably there are 10 to 12 million.

It is hard to escape the thought that in these two rulings a clever device was set up to deceive the American people, both as to how many had come in, and how many are here today.

Now, if it were not for this deception, and if prominent representatives of the Jewish people were not taking a leading, indeed, dominating, part in vital American policy, we would not need to be concerned. But prominent Jewish organizations and Jews are taking a very leading part in the making of several policies which threaten our involvement in foreign wars, and the complete destruction of our Constitutional form of Government here in the U.S.

It is apparent that left-wing Jews, working in close conjunction with communists, are largely responsible for the so-called integration decision of the Supreme Court of May 17, 1954. This is readily shown by high Jewish authority.

Thus Dr. John Slawson, Executive Vice President of the American Jewish Committee, said on page 631 of the *American Jewish Year Book*, Vol. 57, for 1956:

"Earlier, I said that the desegregation decision of the Supreme Court was one of the major events of the year effecting our work. This historic ruling is a significant high water mark in America's battle against discrimination on racial, religious, and ancestral grounds—a battle in which the American Jewish Committee has long been among those leading the assault.

"It was most fitting, therefore, that we were very closely involved with the Supreme Court decision. Not only were we active, along with other organizations, in the filing of an amicus brief, but we contributed materially to the social theory upon which the desegregation decision was based. The

ruling, you know, gave great weight to sociological and psychological factors..."

It was, indeed, a "battle in which the American Jewish Committee has long been among those leading the assault." It was a battle in which the forces of communism, working alongside JEWS, won! For the communists have been working at least as long as the Jews for this very end. As a result, the South has been torn with the threat of what still may prove to be civil war. Since the end of the ill-fated Reconstruction period in 1877, and down to 1954, great progress had been made by both Negroes and Whites in living side by side in the southern states. All this edifice of good will has now been largely destroyed. And in cities like Washington, New York, and Philadelphia, near chaos has been brought about by political attempts to enforce integration in public schools and apartments. This is due to the activities of such groups as the American (?) Jewish Committee and its militant ally the Anti-Defamation League of B'nai B'rith.

Closely akin to the segregation decision is the passage in 1957 of the so-called Civil Rights Law. The philosophy back of the Civil Rights Law is that Negroes have the right to say with whom they shall attend school, and whom they shall have as fellow-tenants in their apartment buildings—but that the whites have no such right. Many alien-minded Jews, this people who have received so much from America, boast in effect that they are the authors of this Law.

Indeed, the Anti-Defamation League, who are the shock troops of organized Jewry, had the audacity to make an "Award" to the Congress of the United States for passing the Civil Rights Law; and with great fanfare they invited the entire membership of Congress to a formal dinner at the Mayflower Hotel, Washington, on March 3, 1958, to accept this "Award." It is somewhat reassuring to real Americans that a rather small minority of the 531 Members of both Houses of Congress attended. The newspapers, including those controlled by Jews, were significantly silent about the affair.

We have already dwelt at some length on the part the Jewish groups have played in minimizing the Jewish population of the U.S. From the writings of various Jewish groups it is apparent that control of immigration is near the top of the list of Jewish aims!

It has been widely asserted that over 200 members of the House of Representatives have been recipients of campaign contributions from Jewish sources. Jewish groups have been in the forefront, but always secretly, of campaigns to defeat any

man in either House of Congress who, they thought, would not do their bidding. There is little doubt that Sen. Burton K. Wheeler of Montana—one of the ablest Americans in the Senate in recent years—was defeated for re-election in 1946 by a stealthy campaign which was aided, if not directed, from an apartment in the Waldorf Astoria Towers, N.Y.

In the same way the late Sen. Herman Welker of Idaho was defeated for re-election in 1956 by a campaign of stealth and falsehood and innuendo, which likewise emanated from the same source. Other men in both Houses have been similarly defeated.

Harold Stassen, the ardent internationalist office seeker, who has announced his candidacy for the Republican nomination for Governor of Pennsylvania, though he has hardly lived there at all, is said to have a campaign fund of \$750,000. Were does it come from?

Of course the Zionists, most but not all of whom are Jews, were at the bottom of our involvement in the setting up of the purely synthetic state of Israel. If keen American minds had sought diligently to find an action which would work greater harm to America they could not have done a better job. And there's not an Arab in the Middle East, or anywhere else for that matter, who does not know that ex-President Truman, under Zionist pressure, prevailed upon the UN in late Nov. of 1947, to reverse itself and adopt the Partition Resolution. So all Arabs blame the United States! And the Zionists got us into it!

Of course the Zionists had had this aim for 40 years or more. But the U.S. and Britain, both under extreme Zionist influence, were responsible for bringing Israel into existence.

There are multitudes of Jews in the U.S. who are utterly opposed to Zionism and the state of Israel, and do not hesitate to say so. They have received rather poor backing from American non-Jews. So here, in the setting up and continued maintenance of Israel, important Jewish elements have influenced American foreign policy with the likelihood that before the question is settled, millions of non-Jewish Americans will be drafted to lay down their lives in a war to maintain the "independence" of that synthetic State.

America has been a Christian country from the start. There is so much historical evidence of this that it needs no proof. The Supreme Court in the case of "The Church of the Holy Trinity vs the United States" held in 1891, after a lengthy review of the record, that the U.S. "is a Christian nation." And this case was cited with approval by the Supreme Court as recently as 1930.

As we study documents like the American Jewish Committee Budget of 1953, a 280 page volume, (\$5.00 order from CEA,) we find that organization engaged in propaganda work in almost every cultural and religious field in the U.S. Though most Americans seem to be entirely ignorant of it, these left-wing Jews are seeking to remold the Christian religion and even the NEW TESTAMENT itself. They are seeking wherever possible to undermine Christianity, to weaken and dilute it—under the guise of "BROTHERHOOD." It's they who are trying to take Christ out of Christmas. It's they and their friends who have in many cases sought to prevent the singing of Christmas carols in the public schools, and to ban the setting up of Creches in various school yards. Some of these groups are almost as anti-Christian as the communists themselves, and indeed many of their members have communist or communist front records.

It is unfortunate that some Christians, have yielded to the blandishments of these overeager Jews and have been willing to make concessions, the effect of which has been to water down Christianity.

It is a striking commentary that some of these great Jewish propaganda organizations so control the Washington Admini-
